## **Policy—Commercial refrigeration equipment used in Domestic applications**

Please note:

All refrigeration products sold for domestic use in Australia and New Zealand must meet a range of Mandatory and Legislated standards. This is a legal requirement in all states and territories.

Many of the standards applicable to domestic appliances require independent, third party accreditation to a range of tests specifically and uniquely applicable to domestic equipment.

The specific legislation covering the sale and supply of equipment intended for domestic use differs substantially from that applicable to commercial refrigeration equipment in a wide number of areas from electrical safety requirements through to mandatory energy star rating schemes.

Similarly, BM Refrigeration Services does not warrant that manufacturer design envelopes and performance goals include the fit, finish, noise and other customer demands of domestic applications. BM Refrigeration Services specifically does not warrant that the products it uses for its commercial refrigeration work are suitable for domestic applications, nor does it represent that it will personally comply with applicable standards requirements nor that it has any of the appropriate certifications or accreditations for domestic applications.

For this reason, it has always been, and remains the policy of BM Refrigeration Services that the commercial refrigeration equipment that it supplies, or on-sells to any party, is strictly not for use in any domestic applications.
